WEB DEVELOPER PROFILE

I am a front end developer with a background of 12 years in the hospitality industry who enjoys the challenge of translating the ideas and design of a project to a working and accessible site. In my previous career, I was known for being reliable, compassionate, and a problem solver whether leading the team or following directions. I was also often a mentor to many colleagues and junior employees as I worked in lead training roles

SUMMARY OF SKILLS

JavaScript | React JS | RESTful APIs | Firebase | CSS3 / SASS / SCSS | HTML5 | Git | GitHub |

Project scope and Management | Paired Programming & Team-based Development | Web Accessibility | Responsive Design |

Time Management | Problem Solving | Conflict Resolution | Leadership | Self-sufficiency | Multi-tasking | Time Management |

RECENT PROJECTS

Bar Menu Helper (Skills: React, REST API, SCSS) [Solo] - GitHub - Live Link
- Creating a multi component React application based on Axios for API calls, utilizing useState and useEffect hooks for functionality as well as practicing the use of passing props through components.

Tremors (Skills: React, REST API, Firebase) [Group] - GitHub - Live Link
- The Juno Bootcamp final project combines React, Firebase and API usage to call and store data involving earthquakes. We were able to utilize a stretch goal using a second Api using promise chaining allowing the user to also search by destination. We used three React Libraries to display the map as well as for creative styling.

Javascript Sommelier (Skills: Javascript,REST API, SCSS) [Group] - GitHub - Live Link
- This project was an opportunity to work with API calls in vanilla javascript. Our original MVP was to create an API call to pair a meal with a varietal of wine chosen via drop down menu. We were able to further expand the project to include a second API call to pair a wine to a food from a typed text input.

Under the Sea (*Skills:* Javascript, *Responsive Design, CSS3, HTML5*) [Solo] - GitHub - Live Link - Original PNG
- Design to website translation with implementation of media queries for functionality on multiple screen sizes. During this project I used a mobile first design strategy as no mobile design was provided. Stretch goals consisted of Javascript to create a functioning hamburger menu and image carousel on mobile screens.

EDUCATION & TRAINING

Juno College of Technology | Web Development Immersive Bootcamp and Intro to Web Development Course | Toronto 2022

WORK EXPERIENCE

The Well Hamilton Inc, *Toronto & Hamilton, Canada*   2021 – 2022
